RESEARCH INTERESTS

Machine Learning, Artificial Intelligence, Data Mining, Healthcare Analytics, Computational Neuroscience, Data Science

SKILLS & INTERESTS

- **Programming Languages & Frameworks:** Java, Python (working knowledge), HTML, CSS
- **Databases:** MySQL
- **Deployment & Versioning Tools:** Git, GitHub
- **Data Science:** Pandas, Scikit-learn, NumPy, Matplotlib, Jupyter Notebooks
- **Business Intelligence Tools:** Tableau
- **Containerization Tools:** OpenShift
- **Build/Release (CI/CD):** Jenkins
- **Version Control Tools:** GitHub, GitLab
- **Tracking Tools:** Jira
- **Development Environments:** Anaconda, IntelliJ IDEA, Spring Tool Suite
- **Interests:** Data Mining, Machine Learning, Artificial Intelligence

WORK EXPERIENCE

United Parcel Service

Jan. 2021 - Apr. 2024

Senior Software Development Engineer

Louisville, KY

- Lead full-stack development with Angular and Spring for the UPS Flight Crew Systems app.
- Designed a feature for seamless Airline Guide file transfer using Kubernetes MicroServices.
- Enhanced UPS Encryption Client with HashiCorp Vault for improved security, upgraded security standards with Java 11, REST, and Spring Vault.
- Utilized Kafka and ActiveMQ for efficient data processing, tested endpoints using Postman, SOAP, and Apache Camel.
- Refined product backlog with product owners and teams in Agile settings.

UC Merced

Jul. 2020 - Jan. 2021

Graduate Scholar

Merced, CA

- Conducted research in data science and machine learning methodologies.
- Assisted in literature review, experimentation, and documentation of research findings.
- Collaborated with faculty and researchers on academic projects and publications.
- Presented and communicated research outcomes through reports and technical documentation.

Wiser Solutions Inc

May 2019 - Jan. 2021

QA Data Analyst

San Mateo , CA

Wiser Solutions, a SaaS company, specializes in retail analytics and data-driven insights for business optimization.

- Streamlined data collection processes to increase accuracy and reduce turnaround time for reporting by 40%.
- Conducted detailed metric and trend analysis for strategic insights.
- Developed and executed data cleaning protocols to improve data integrity and reliability.
- Utilized advanced data visualization tools to interpret complex datasets and present actionable insights.

EDUCATION

San Jose State University

2018 - 2020

MS in Computer Engineering, Data Science

San Jose, CA

Gujarat Technological University

Jun. 2014 - Apr. 2018

Bachelor of Science in Computer Engineering

Vadodara, India

RESEARCH PROJECTS

Designing a Smart Scheduler using Reinforcement Learning

- Contributed to a research project involving complex datasets from Lam Research for wafer construction.
- Spearheaded efforts to enhance wafer processing throughput and speed by 90%, implementing a Deep Learning model for optimal execution.
- Used a DNN model to predict the next action based on a state and action pair, assigning rewards to the selected action, thereby significantly improving strategic outcomes. Demonstrated leadership qualities within the team, fostering collaboration and effective project execution while ensuring timely delivery of milestones.

Image and Scene Augmented system to assist people

- Developed a system to enhance customer experience by providing useful visual aids displayed on the screen.
- Implemented a mechanism for projecting information based on speech commands and the scene's context captured by the device.

PUBLICATIONS

[A Machine Learning Approach to Predicting Diabetes Using Healthcare Data](#)

TechRxiv, 2025

- Developed and evaluated classification models using Python, Scikit-learn, Pandas, and NumPy to predict diabetes from healthcare data.

[Algorithmic Disparities in Data-Driven Decision Systems: Empirical Evaluation of Group-Level Error and Calibration Differences.](#)

Preprints, 2026

- Conducted research on algorithmic fairness, model calibration, and ethical AI through empirical analysis of demographic bias and predictive performance in data-driven systems.
